High capacity hard disk drive for desktop applications at an affordable price

The Seagate® Desktop HDD is the industry standard hard drive for mainstream desktop computing, delivering both exceptional reliability and performance. A host of refined technologies helps boost performance further than ever before. The Desktop HDD is perfect for desktop performance towers or all-in-one computers, consumer-grade NAS devices and desktop RAID arrays. In fact, the Desktop HDD gives you a single hard drive platform for every desktop storage application. One drive with trusted performance, reliability and simplicity in capacities up to 6TB.

1TB-per-disk technology incorporates 340,000 unique tracks in the width of a single inch. This incredible storage density drives new capacity possibilities and lowers your total storage costs.

The Seagate Desktop HDD is Windows® and Mac® compatible. Thanks to the free Seagate DiscWizard™ software, installation is easy. It lets you migrate content from your old drive and configure volumes larger than 2TB[1].

[1] This high-capacity drive may require special drivers for Windows to access disk capacities above 2TB. Visit www.seagate.com/beyond-2TB for more information.
